Gustavo Fabregat, MD, PhD
Xavier Sala-Blanch, MD, PhD
TARGET AUDIENCE
This course is designed for Pain physicians or pain medicine fellows in training (pain specialists, anesthesiologists, neurosurgeons), interested in the practice of pain management, who seek the latest developments in interventional techniques, also seeking CME credit hours and introduction or review of proven interventional techniques.
BY ATTENDING, PARTICIPANTS WILL BE ABLE TO integra-tion, review of proven interventional techniques.
- Each cadaver station is limited to a maximum of 7 participants.
- Our faculty consists of internationally renowned experts in the field of interventional pain management techniques.

OBJECTIVES
After participation in this educational meeting, participants should have an understanding of:
1. Basic neuroanatomy related with the performance of pain therapies
2. Identify questions that need to be addressed to increase knowledge of interventional procedures used in pain treatment
3. Perform craniofacial and spinal procedures of the cervical, dorsal, lumbar spine and pelvis.
4. Define the characteristics of an ultrasound image and identify all landmarks of the cervical, lumbar and caudal.
5. Define the principals and standards of an MSK ultrasound examination and perform ultrasound guided MSK injections of the shoulder, hip and knee.

ACCREDITATION
An Application has been made to the EACCME® for CME accreditation of this event.
